

Workers' compensation fraud costs \$5 billion annually.

- National Insurance Crime Bureau (NICB)

75% of drug users are employed. These users cost their employers twice as much in medical and workers' compensation expenses.

- U.S. Dept. of Health & Human Services

Retail losses hit \$41.6 billion in 2006. The majority of this is attributed to employee theft.

- National Retail Federation

DIGITAL VIDEO SURVEILLANCE: An effective tool against fraud, theft and other risks.

Risky Business

Businesses experience a myriad of serious risks every minute. Without help to manage these threats, organizations can suffer decreased profits, serious liabilities and devastating losses. Video surveillance is a strong deterrent to theft and fraud and gives businesses valuable physical evidence.

Seeing is Believing

Video surveillance is a key protection and prevention tool with a proven track record of effectiveness. Arming businesses with the ability to view live or recorded images of their offices, stores, warehouses, employee areas, parking lots and more via the Internet, video surveillance provides an easy and affordable solution to protect company assets, prevent fraud and reduce risks.

Why Digital Video Surveillance?

- Easily viewed remotely 24/7 via the Internet
- Advanced recording, storing and review features
- No tapes to manage or archive
- High resolution, crisp color images
- Ability to share video with law enforcement, management and others
- Wide selection of cameras available, including hidden and indoor/outdoor models
- Custom-built DVRs, created specifically for you
- Affordable systems designed to suit your needs and focus on your company's key risk areas
- Simple to upgrade and expand
- Minimal training required
- Provides peace-of-mind and high return on your investment
