

Is your store at risk?

Retail stores and shopping malls have long faced significant security challenges, such as armed robbery, burglary, credit card fraud, employee theft and shoplifting. Recent news has also headlined the significant threat of mall violence, resulting in a widespread concern about the critical need to see what's happening in and around retail establishments at all times and the ability to quickly share critical information with legal authorities and key store personnel in the event of a crime.

Video surveillance systems give store management and law enforcement personnel the eyes they need to effectively protect employees, customers and assets and investigate a crime or manage a crisis situation.

Video Surveillance Benefits:

- Provides an effective, budget-friendly method to improve store security and monitor cash registers, retail floors, storage rooms, parking lots and more.
- Supplies irrefutable, clear visual evidence in the event of a security breach or incident.
- Assists with employee and consumer behavior modification and proactively works to prevent problems.
- Decreases theft and property losses, resulting in lower insurance premiums.
- Delivers high return on investment and increased profitability.

Watch it all with ADS

Key Store Monitoring Areas:

- ⇒ Sales counters / cash registers
- ⇒ Retail floors / high traffic zones
- ⇒ Inventory storage
- ⇒ Elevators / escalators
- ⇒ Parking lots
- ⇒ Employee break areas

Digital Video Surveillance Systems Protect Your Assets, Employees and Customers by Offering:

- Live remote viewing via the Internet.
- Sharp, color images.
- 24/7 uninterrupted operation, no operator necessary.

- Weather and bullet-proof exterior cameras

We also offer:

- Digital video recorders (DVRs)
- CRT, flat-panel and LCD TV monitors
- Video switches and controllers
- Cables & mounting hardware
- Installation, service and support

ADS: The Quality Choice

Advanced Digital Security, Inc. (ADS) has been designing, implementing and servicing digital video surveillance systems for almost two decades. ADS offers the best security expertise, featuring over 100 years of combined experience.

Our Difference:

➤ State-of-the-Art Equipment

Our systems feature the finest components from top manufacturers. To maximize quality and customization, we build our own DVRs using Pentium 4 processors and brand-name components from companies such as Western Digital.

➤ Technology

ADS utilizes the most dependable platforms to ensure that your system is consistently reliable. While ADS systems usually operate on Windows XP®, we are also experienced in working with other platforms.

➤ Experienced, Dedicated Staff

Unlike many other companies, ADS service and installation staff are background-checked company employees. To maintain the highest integrity, we never use outside contractors or third parties.

➤ Competitive Pricing

Our experience, national buying power and strategic alliances with key manufacturers empower us to offer you the best prices in the industry. We won't be undersold.

➤ Training

ADS is committed to teaching your staff how to make the most of your video surveillance system. We'll train your employees, ensuring they know how to properly utilize the equipment and get the most from all features.

➤ Service and Support

Our commitment to your organization doesn't end when your installation is complete. We proactively remain in contact with you and are readily available should you ever need assistance.

The ADS Promise

Our promise is simple, yet powerful:

"We promise to provide an honest assessment of your security risks, whether they are minor or complex, and to deliver a solution that effectively addresses them using the best equipment at the most competitive prices. We also promise to support you and your staff once our system is implemented, whenever the need arises."
